Modules: ITIL® Product (Version 5), ITIL® Service (Version 5), and ITIL® Experience (Version 5)

Date: 12 March 2026 (Commercial Launch)

Scope

- This document aims to **facilitate the Commercial Launch** and is intended **only** for Accredited Training Organizations and Trainers.
- It outlines the **changes made to the ITIL Product, Service and Experience since the Partner Launch** (launched on 12 February 2026).
- We greatly appreciate your **feedback**. Please ensure it is submitted **through the usual channels** through this [form](#).

Introduction to ITIL (Version 5)

- ITIL has a **strong global brand**, adopted and adapted by organizations and professionals worldwide, thanks to the continuous involvement, active engagement, and **co-creation with our community**.
- While we recognize that parts of the ecosystem may remain aligned to **earlier ITIL versions**, this continued adoption is a testament to the **stickiness of the ITIL brand**.
- ITIL (Version 5) provides a new opportunity to further expand ITIL's global reach and demonstrate how it can truly empower organizations and people to **lead transformation with confidence**.
- ITIL has consistently been the **Global Best Practice Framework** across its successive focus areas, evolving from IT Service Management (ITSM) to Service Management (SM) and Digital Transformation. While **ITSM and SM (including Enterprise SM) remain our long-established leading areas**, we are **expanding the ITIL scope and positioning as the Global Best Practice for Product and Service Management in an AI-driven world**.
- **The ITIL evolution is built on the feedback and trust of millions**, enabling a shift from a theoretical, IT-focused approach to a **comprehensive, organization-wide, practical, value-driven, and AI-native framework**.
- **Fundamental ITIL concepts and principles remain the same, slightly adjusted or simply repositioned in this new context.**
- **A relevant example is the positioning of the ITIL Management Practices.** All 34 ITIL Management Practices remain unchanged and continue to sit at the core of the ITIL Framework as essential value enablers. However, in the new ITIL Foundation, the **focus has shifted away from memorizing knowledge related to individual practices towards understanding their purpose, structure, benefits, and their role within the ITIL value system.**
